CENTRIFUGES

Revolutionizing Fluid Filtration
A Division of Advanced Separation Technologies

CentraSep Liquid-Solid Separator is the Gold Standard for Centrifuges

Revolutionizing Liquid Separation Since 1981

Fluid Management Expertise

Since 1981, CentraSep Centrifuges has been an innovator in environmental products and fluid management services. With our patented CentraSep centrifugation technology we have proven results in the most demanding situations throughout a wide range of industrial, commercial and institutional applications.

CentraSep revolutionizes fluid filtration and separation in applications requiring clarified process fluid. Unique design, efficiency features and patented centrifugation technology are the keys to a superior system that saves money and increases bottom line profits by offering such benefits as:

- **Fully Automatic Operation**
- **Lowest Maintenance in the Industry**
- **Maximized Tool and Fluid Life**
- **Reduced Waste Stream / Recyclable Waste**
- **Low Operating Costs / Media-Free**
- **Standard 316 Stainless Steel Construction**
- **Lifetime Warranty Available**
- **Extensive International Installations**

About CentraSep Centrifuges

CentraSep Centrifuges' primary product is, as the name implies, the innovative CentraSep centrifuge, which is based on a unique, streamlined design that has been proven to eliminate common centrifuge problems and minimize maintenance, while maximizing effectiveness. CentraSep centrifuges are designed for separating liquids and solids in a diverse range of applications, such as glass grinding coolant filtration and recycling, paint booth water wash filtration, wire drawing coolant filtration, and many more. CentraSep centrifuges have a standard 316 Stainless Steel construction, fully automatic operation, no consumable media, a low operating cost, the lowest maintenance in the industry, and an optional Lifetime Warranty. These features and a solid reputation have resulted in extensive North American and International sales and installations.
